

YOUR VET
HAS PRESCRIBED

NexGard
SPECTRA[®]

YUM ~~ONE~~ AND DONE.†

Congratulations!

Your dog is now protected against these key parasites:†

- ✓ FLEAS
- ✓ TICKS
- ✓ MITES
- ✓ LUNGWORM
- ✓ ROUNDWORMS

So, let's take a quick look at why your vet prescribed **NexGard Spectra®** and how easy it is for you to maintain that protection.

The parasite protection your vet has prescribed is NexGard Spectra® – a once monthly, tasty, soft chew that your dog will enjoy taking and you can enjoy giving.

› Tasty, soft chew

› Given monthly

› Protects your dog inside and out

YUM AND DONE!

WHY

YOUR VET
HAS PRESCRIBED

NexGard
SPECTRA®

PARASITES

are a continuous health threat to your dog, and can pose a serious risk to your family too.

YEAR-ROUND FLEAS

- Very common problem in dogs
- For every 5 fleas seen, there are 95 flea eggs, larvae or pupae hiding in the home or garden¹

Fleas can also feed on people and transmit disease²

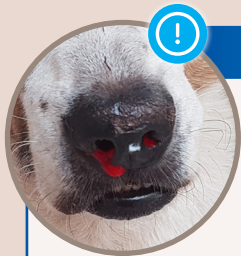

THREAT FROM TICKS

- Ticks are commonly found on dogs across the UK³
- Can transmit serious disease to your dog and your family⁴

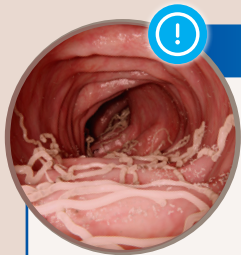

Can also transmit Lyme disease to people⁴

DEADLY LUNGWORM

- Dogs get lungworm by exposure to infected slugs and snails⁵
- Lungworm (*Angiostrongylus vasorum*) is spreading throughout the UK and Ireland⁵⁻⁸

Causes serious health problems for dogs which can be fatal⁹

ROUNDWORM RISK

- Very common in dogs, especially puppies¹⁰
- *Toxocara canis* can be transmitted to humans, with exposure associated with asthma, epilepsy and decreased learning ability¹¹⁻¹³

Children are especially at risk due to their inquisitive habits¹⁴

WHY

YOUR DOG AND
YOUR FAMILY NEED

NexGard
SPECTRA[®]

WHY

MONTHLY DOSING?

NexGard SPECTRA®

- › Monthly dosing with NexGard Spectra® will control fleas and ticks throughout the entire year
- › Only monthly worming can prevent deadly lungworm disease⁵
- › Only monthly worming will prevent dogs from shedding harmful roundworm eggs into the environment¹⁵

It's rewarding to know that with NexGard Spectra[®], protecting your dog from key parasites is a pleasurable experience for you and your dog.

One tasty, monthly chew consumed in a few seconds means hours of outdoor fun for both of you without worry about the risk of parasites.

You can even stroke and cuddle your dog straight away and swimming, bathing and shampooing won't reduce its effectiveness either. And even just giving your dog the tasty treat they love, strengthens your bond and provides you both with an extra moment to look forward to.

Of course, it's reassuring to know your vet appreciates that giving a chew that dogs love is key to the successful administration of the full dose of oral medicine – maximum protection with minimum fuss. That's why they confidently recommended NexGard Spectra[®] and offer a taste guarantee in the unlikely event you should you have any concerns.

Why not write your **MONTHLY TREAT** date down here:

Monthly treat date: _____

and then set up a convenient reminder using a smart phone, smart speaker or other compatible device.

NexGard SPECTRA®

~~YUM~~ ONE AND DONE.

† NexGard Spectra® also covers heartworm, hookworms, whipworm and eyeworm. NexGard Spectra®'s mite indication is for treatment of sarcoptic mange and demodicosis. NexGard Spectra® does not cover ear mites or tapeworm.
